ELECTRONIC::SYSTEMS

SAY HELLO TO **ELISA^{IV}** THE REVOLUTION IN COMMUNICATION INFRASTRUCTURE.

ELISA^{IV} THE NEXT GENERATION OF SOUND REINFORCEMENT

The world's first system to combine **classic 100 V technology** with the **new digital LineRush® Technology** in hybrid operation, designed for voice alarm and passenger information systems.

Simplest system configuration:

One building block for every system size.
ELISA^{IV} makes scaling easier than ever.

Adaptable, flexible, customizable:

Faster development, easy deployment,
lower maintenance costs

IoT ready:

Sensor. Actuator. Or both. **ELISA^{IV}** is
the first sound reinforcement system
with IoT integration.

Full digital power with LineRush:

Up to 20 simultaneous audio channels,
up to 16 loudspeaker lines, and up to
1200 W total power. All on a single plat-
form.

Security at the highest level:

Per IEC 62443-3-3 SL3, fully compliant
with the **EU Cyber Resilience Act (CRA)**.
Certified redundancy concepts per EN
54-16 and VDE 0833-4.

Your benefit:

Significant reduction in total cost of ownership
at every stage of your project.

Planning

- ✓ All-in-one approach
reduces variant complexity
- ✓ Fast, reliable sizing
- ✓ Less coordination effort,
fewer planning errors
- ✓ Shorter planning times

Installation

- ✓ Pre-configured components,
minimal space requirements
- ✓ Automatic hardware detection
- ✓ Reduced central technology
and cabling
- ✓ Faster project completion

Service & Operation

- ✓ Web-based management
- ✓ Automatic transfer of settings
when replacing devices
- ✓ Extensions without major
intervention
- ✓ Significantly less downtime

**Say hello to ELISA^{IV} and learn more about
the future of sound reinforcement.**
